

Nicosia, October 28th 2013

A.P.E. Technologies Srl is an international market leader in polyethylene foam thermoforming and the agglomeration of polyethylene closed cell foam used in various sectors including sportsfields underlays (shockpads). A.P.E. in partnership with the AHT International Group has developed a new heated shockpad system with special grooves which accommodate our Outdoor Amorphous Heating Ribbon. The new APE/AHT heated shockpad system was presented for the first time with great success at the International Trade Fair for Amenity Areas, Sports and Pool Facilities FSB he FSB in Cologne between the 22nd to the 25th of October 2013.

We would like to thank Mr Emanuele Locatelli the A.P.E. Technologies General Manager for his exceptional and innovative work. We would also like to thank Mr Ron Van Wijk of AHT Netherlands and Mr Edoardo Marabese of AHT Italia for all their hard work and support for this new success which makes the AHT Outdoor heating ribbon much more accessible and attractive to the international sportsfields market as well as Mr Mario Cacchia Managing Director of Alternative Technologies, Malta for his constructive comments and suggestions.
